

OnePointe Solutions Case Study

NEWEST BIOTECHNOLOGY LAB FOR RADIO-PHARMACEUTICALS

Laboratory Design & Build

THE ORGANIZATION

Our customer is a biotechnology company, based in Texas, focused on innovative targeted radiopharmaceuticals for diagnosis, monitoring and therapy of various types cancers.

They chose not to disclose their name due to the sensitive nature of their research.

THE PROBLEM

The client, who works in radio-pharmaceuticals, was in the market for laboratory cabinets for their new building. The organization was in discussions with OnePointe Solutions and VWR, a competitor, on who could deliver what they needed. After a negotiation period, Radio-Pharmaceuticals went with OnePointe Solutions to get the job done.

Initially, our customer needed laboratory cabinets, but we were able to provide a full cabinet/fume hood/bio safety cabinet solution. We worked closely with the organization to meet their needs and time frame to get the installation completed in one day.
