

OnePointe Solutions Case Study

REED FOOD TECHNOLOGY FOOD LAB

Laboratory Design & Build

THE ORGANIZATION

Formed in 1995, Reed Food Technology is a family-owned and operated customer food product developer and private label food manufacturing company.

Their goal is to deliver high-quality, cost-effective food products to their customers with some of the lowest minimums, fastest R&D turnaround, and shortest lead times in the industry.

THE PROBLEM

The client needed a highly functional and durable food laboratory. The lab needed to have a logical flow and features that would make lab organization easier, promote cleanliness and to develop a sense of shared pride by those who would be working in the space.

REED FOOD TECHNOLOGY FOOD LAB

Laboratory Design & Build

Technical Specifications
Lab Design
Casework
Fixtures
Custom Wall Cabinets
Chairs

THE PROJECT

The lab would be used for all research & development functions that would fall under the scope of product mix in which the company is equipped to process and mass produce.

The install for this project was completed in five days. The entire process of the project, from initial conversations to the completed lab ready for use, took around four months.

REED FOOD TECHNOLOGY FOOD LAB
Laboratory Design & Build

THE RESULTS

This was a custom cabinet design. We were able to make the doors open upward by how the hinges were fashioned.
