

OnePointe Solutions Case Study

SOUTHERN CALIFORNIA LAB RENOVATION

Laboratory Design & Build

THE ORGANIZATION

Our customer is a clinical stage biologic therapeutic company.

Their mission is to deliver optimized, biologic therapeutics to people with life-threatening conditions. With this goal, they have built a large and diverse pipeline with the potential to impact cancer and orphan diseases through our single domain antibody platform technology.

They chose not to disclose their name due to the sensitive nature of their research.

THE PROBLEM

DZI Construction, Inc., a local construction firm in the area of the client, was working on completing a 35,000-square-foot laboratory and office tenant improvement for them. However, the local vendor they were using had longer lead times and higher costs for materials they needed. So DZI Construction, Inc. reached out to OnePointe Solutions in hopes of having better lead times and costs. We were readily available to meet their request.
