Laboratory Shelving

One of the most important areas of storage, laboratory shelving needs to be easily accessible, sturdy, and easy to clean and organize.

However, there is an important choice that must be made for the sake of mobility.

Questions that Need Answers:

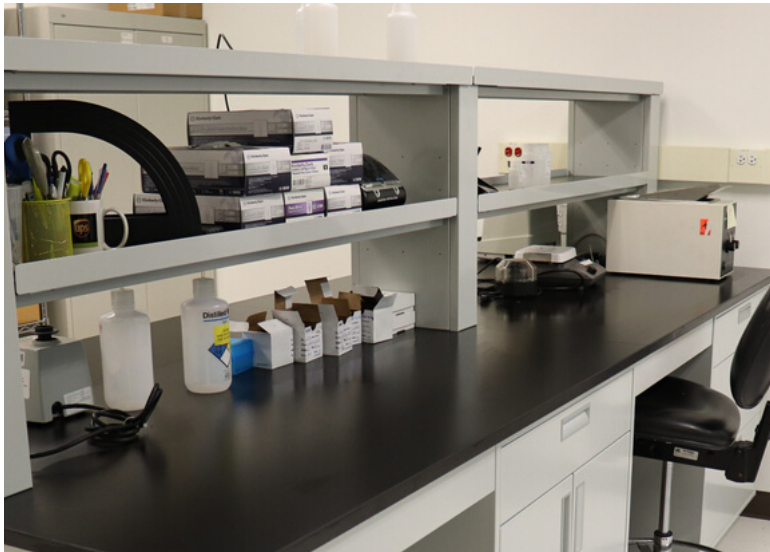

- How much weight will the shelves be holding?
- Will the shelves be accessed from both sides?
- Is there a need for mounted casework/storage?

We offer two kinds of laboratory shelving:

- Fixed
- Modular

Fixed Shelving

"Fixed Shelving" refers to bolted-on shelves. These offer greatly increased storage capacity and sturdiness at the cost of flexibility and adjustability.

Modular Shelving

"Modular Shelving" refers to a height adjustable shelving system allowing the user to easily move the shelving up or down within slotted uprights.

Modular Shelving

Thank You.
