Mobile Casework

In lab or work settings, mobile cabinets are underneath desks and benches with foot casters for easy mobility.

Mobile cabinets are extremely high-quality solutions for modular labs that require flexibility for both research and education. We can make mobile casework from the following materials: PLAM, wood, stainless steel and metal.

Like all of our products, you can customize the look and design of mobile casework. All dimensions, door and drawers configurations, colors, finishes, accessories, and handle options can be changed.

Metal Mobile Casework

Ideal for any flexible lab or work setting from research facilities, medical centers and educational classrooms. The metal we use is SEFA certified, durable, easy to maintain and has chemical and bacterial resistance.

Wood Mobile Casework

Perfect in dental offices, school rooms, libraries, apartment complexes, warehouses, hotels and more. The wood we use for our mobile casework is heavy-duty constructed and is designed with sturdy back panels, soft hinges and fully assembled in our on-site factory in Elgin, TX.

Thank You.

Give us a call at (866) 612-7312 or email info@onepointesolutions.com for help selecting the right lab furniture for your project.
