# PLAM Casework

Wood/PLAM casework is an ideal heavy-duty solution for education, medical facilities, break rooms, and hospitality.

Wood/PLAM can add a touch of craftsmanship and integrity to any laboratory setting, and is great option if looking to keep aesthetics and costs in mind.

Although Wood/PLAM is less resistant to heat, chemicals, bacteria, etc., than many other materials, it can be an excellent choice in BSL-1 applications like educational laboratories or research facilities.

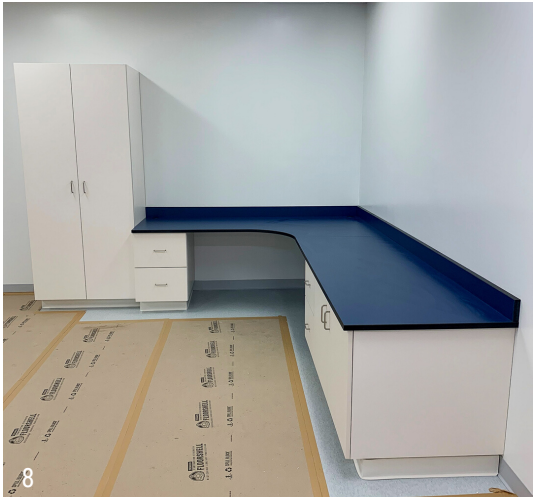

**All of our Wood/PLAM  
casework is in compliance  
with AWI standards and  
regulations.**
